Average: \$53,256
Median: \$11,779
Largest: \$466,339
Smallest: \$376

Annualized Return: 2.07%
Annualized Volatility: 38.12%
Information Ratio: 0.05
Forward P/E: 7.38
Price/Book: 1.43
Dividend Yield: 2.56%

Performance data includes back-test results prior to March 14, 2023

The Alerian Texas Weighted Oil and Gas Index is an economic-value weighted index of energy companies that extract oil and gas within Texas.

The Case for Texas Oil and Gas Producers

- 1. Texas producers enjoy unique advantages.** Texas boasts multiple oil and gas formations, including large portions of the prolific Permian Basin, resulting in ample reserves. Beyond attractive geology and cost-efficient drilling inventory, Texas producers enjoy proximity to end markets, significant energy infrastructure, and a supportive regulatory environment.
- 2. M&A activity reinforces the appeal of Texas.** Consolidation has been a key theme in the energy sector as producers look to add high-margin, short-cycle drilling inventory. Multi-billion-dollar transactions focused on producing assets in Texas reinforce the desirability and long-term benefits of Texas acreage.
- 3. Purer Exposure to Oil and Gas Producers.** Companies in the index produce oil or natural gas in Texas, providing purer exposure to producers and therefore commodity prices. Other exploration and production (E&P) indexes often include independent refiners or alternative fuel companies that do not produce oil and natural gas.
